

EUROBLAST 9

The Guyson Euroblast 9 blast cabinet has been designed to accommodate taller components and is equipped with an upper and lower set of armholes; allowing the operator a choice of blasting positions.

Standard Features

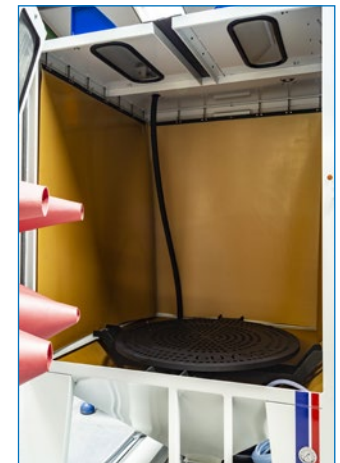

- Trigger operated airwash gun for post blast removal of residual media/dust
- Adjustable gun support arm
- Pneumatic operated door switches prevent accidental blasting when open
- Full width foot pedal operation
- Conveniently angled toughened glass viewing window with protective antifrost sheet
- Externally mounted LED lighting
- Armhole sleeves and separate gauntlet gloves
- Perforated steel floor
- Quick release mixer box below hopper for rapid media change
- Air pressure regulator and gauge
- Moisture trap/air input filter
- Baffled air inlets with quick change breather pad
- Roof slot allowing heavy components to be hoisted into the blast chamber by an overhead crane
- Fork lift channels to assist moving and positioning
- Dust Collector

Options

- Fixed Position Turntable Painted 900mm Dia. 250Kg Load Weight
- Side loader with turntable
- Extra Bulkhead Lights
- Blast Gun Options
